

Internal Quality Assurance Cell (IQAC) has contributed significantly for institutionalizing the quality assurance strategies and processes

IQAC of the college was set up on 25th of July, 2012 to ensure qualitative teaching-learning process. Since its inception, IQAC has commenced a number of good practices in the institution. Two most important among them include lesson plan and feedback from the students, alumni, etc. All the teachers prepare their monthly plan and teach accordingly. This has resulted in not only interested and interactive teaching-learning environment but also completion and revision of syllabus well in time. The students are informed in advance about the topic to be taught the next day. So the students come full prepared and this results into interactive teaching.

Feedback is the backbone of any institution as it is through feedback an institution comes to know about, in reality, his strong as well as weak points, and then persistently strives to convert his negative aspects into positive ones. So, feedback is collected from the students, alumni, etc. relating to infrastructure, teaching-learning process, new courses. On the basis of feedback, tremendous improvement has been done in infrastructure. A modern and state-of-art science block, seminar-cum-conference hall, vehicles stand, etc. have been erected in the college.
